

INDEX TO VOLUME IX

| | |
|---|-----|
| Bailey, W. N. Some integrals involving Bessel functions . . . | 141 |
| Busbridge, Ida W. A theory of general transforms for functions of the class $L^p(0, \infty)$ ($1 < p \leq 2$) . . . | 148 |
| Carroll, J. A. An application of Fourier transforms to the evaluation of a class of repeated integrals arising in calculations of probability . . . | 176 |
| Chaundy, T. W. Linear partial differential equations (I) . . . | 234 |
| Cooper, J. L. B. An integral equation . . . | 263 |
| Daymond, S. D., and Rosenhead, L. Note on a special type of planar triode . . . | 89 |
| Erdélyi, A. On certain Hankel transforms . . . | 196 |
| Gilbert, C. On the occurrence of Milne's systems of particles in general relativity . . . | 185 |
| Guinand, A. P. Summation formulae and self-reciprocal functions . . . | 53 |
| Heilbronn, H. On Dirichlet series which satisfy a certain functional equation . . . | 194 |
| Hodgkinson, J. A note on a two-dimensional problem in electrostatics . . . | 5 |
| Hua, Loo-keng. Some results in the additive prime-number theory . . . | 68 |
| — On Waring's problem . . . | 199 |
| — On Tarry's problem . . . | 315 |
| Iyer, V. Ganapathy. Some theorems on functions regular in an angle . . . | 206 |
| Ko, Chao. Note on the representation of a quadratic form as a sum of squares of linear forms . . . | 32 |
| Kober, H. Unbeschränkte Operatoren, die eine Verallgemeinerung der Fourier-transformationen sind . . . | 41 |
| Lewis, T. Solutions of Oseen's extended equations for circular and elliptic cylinders and a flat plate . . . | 21 |
| Linfoot, E. H., and Shepherd, W. M. On Fourier series satisfying mixed conditions . . . | 121 |
| Littlewood, J. E. On the coefficients of <i>schlicht</i> functions . . . | 14 |
| Love, A. E. H. Electrostatic problems related to a perforated strip . . . | 246 |
| Macintyre, A. J. Wiman's method and the 'flat regions' of integral functions . . . | 81 |
| — The minimum modulus of integral functions of finite order . . . | 182 |
| Mahler, K. On Minkowski's theory of reduction of positive definite quadratic forms . . . | 259 |
| Morton, V. C. The general quadric primal in [5] which is at the same time inscribed and circumscribed to a given simplex . . . | 310 |
| Neville, E. H. Multipolar and multiglobular coordinates . . . | 294 |
| Ostrowski, A. On a theorem concerning identical relations between matrices . . . | 241 |
| Pidduck, F. B. Electrical notes. XI. Magnetron oscillations . . . | 221 |
| Poole, E. G. C. A transformation of Eulerian hypergeometric integrals . . . | 230 |

| | |
|---|-----|
| Potter, H. S. A. On Diophantine approximation and the generalized elliptic theta function | 161 |
| Rado, P. Some elementary Tauberian theorems (I) | 274 |
| Rice, S. O. Van Uven's theorem in probability theory and a self-reciprocal Hankel transform | 1 |
| Richmond, H. W. On certain chains of geometrical theorems | 34 |
| Rosenhead, L., see Daymond, S. D. | |
| Shepherd, W. M., see Linfoot, E. H. | |
| Temple, G. The Lorentz transformation and the dual nature of light | 283 |
| Titchmarsh, E. C. On $\zeta(s)$ and $\pi(x)$ | 97 |
| — The approximate functional equation for $\zeta^2(s)$ | 109 |
| — On divisor problems | 216 |
| Varma, R. S. A pair of functions which are Fourier sine-transforms of each other | 203 |
| Watson, G. N. A note on Gegenbauer polynomials | 128 |
| Young, L. C. A convergence criterion for Fourier series | 115 |
